

Release Note

EYEESEE Cloud Version 1.26

June 2026

Release note | EYESEE Cloud Version 1.26

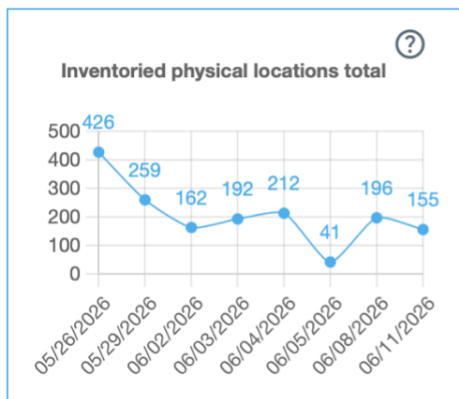

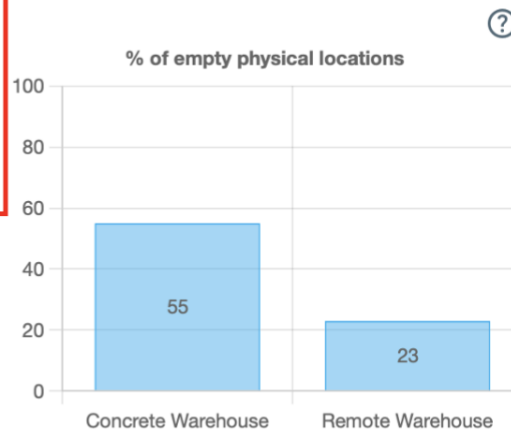

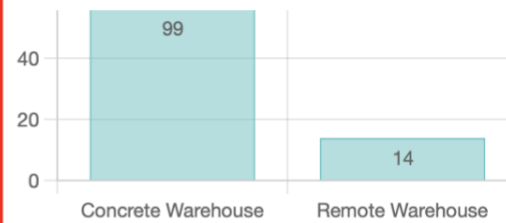

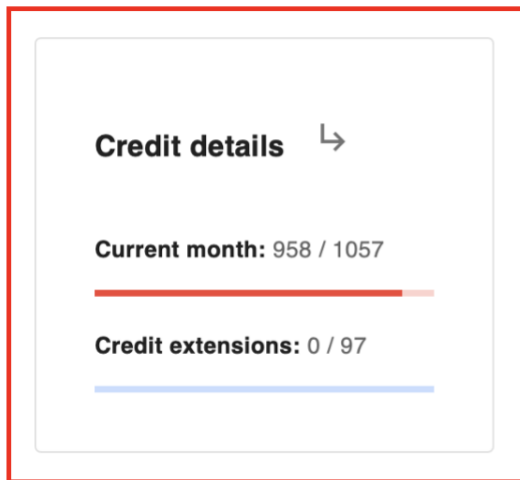

In order to enrich your EYESEE experience and ensure its continuous improvement, we have integrated new features and made updates within the EYESEE Cloud application.

The improvements included in the **version 1.26** release of **June 2026** are as follows.

Table of Contents :

1. Subscriptions & Credits
2. Missions
3. Mission Generator
4. Faces

✓ **Credit details:** the balance of your DJI tokens (subscriptions and extensions) is now visible on your dashboard, with direct access to the subscriptions page.

✓ **History export :** a button lets you download your credit history in one click.

History					⬇
Name	Action	Quantity	Name	Date	
...	...	...	...	...	

2. Missions :

— New Features

✓ **Error photo analysis :** if the photo analysis option is enabled, a button to relaunch the analysis of locations in error (**NO_SCAN**) after the upload will be visible in the mission view, with real-time progress tracking.

Direction

☐ Left to right ☒ Right to left

Expected values
Yes

Minimum altitude
60 cm

State Performed

Mission performance date June 11, 2026 at 02:06 PM

Allow the download to EYESEE APP

☐ Yes ☒ No

Allow the upload from EYESEE APP

☒ Yes ☐ No

Status

☐ Unchecked ☒ In progress ☐ Checked

☐ Route ☒ Acquisitions ☐ Interest points

☐ Ignore 00s at the code beginning ?

☐ Dynamic search ?

Search for barcodes from photos

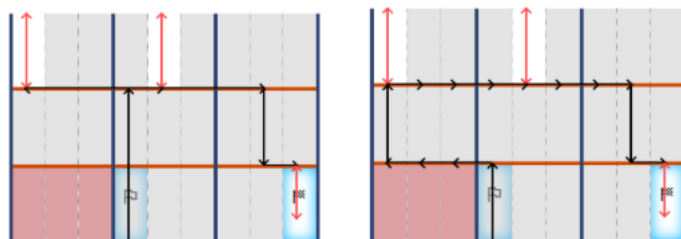

3. Mission Generator :

— New Features

✓ **Limited lateral movements** : the generator has been updated so that all lateral movements are now limited to the width of one location, for more precise routes.

Here is the before and after, left before, right after with arrows added to symbolize each stop.

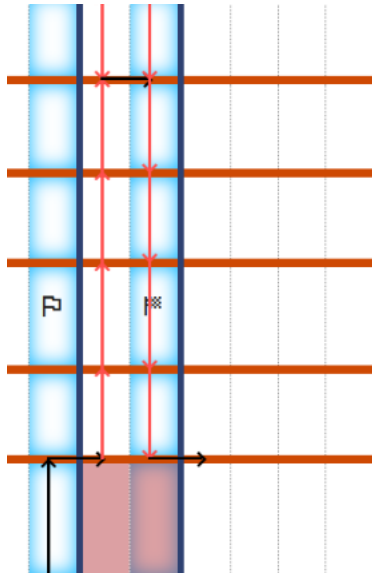

✓ **Mission generation with alternative codes** : when loading an expected items file containing dynamic stacking, you now have a choice between three options — ignore duplicate lines, create a mission with stacked pallets, or create a mission with alternative codes.

 The expected file contains stack or alternative-code locations not configured on the selected face. How would you like to create the mission?

Ignore these locations
Stacked pallets
Alternative codes

✓ **Missions starting and ending on the same bay** : the generator now allows you to create missions whose start point and end point are located on the same forklift aisle.

4. Faces :

— New Features

✓ **Modifying positions in the map view** : it is now possible to modify the order and position of faces directly from the map view, without having to go through another screen.
